

Annexure I

Clarifications – Set II

Procurement of Supply, Delivery, Installation, Integration, Data Migration, Commissioning and Maintenance of 04 No's of Database Servers, 02 No's of Storages, 02 No's of Tape Library and 02 No's of Racks for the Department of Immigration and Emigration.

No.	Page / Clause	Description by Bidder	Existing Content	Clarifications & amended
01	Technical Specifications of Storage High Availability Addendum No.08	Remain Unchanged - This refers to 40 cores as opposed to performance of the storage in terms of IOPs, etc.	– Dual Active-Active Controllers (min. 40 cores) and Redundant paths	Remain Unchanged
02	Volume I – ITB 4.1 Sub Section C – Clarification No.05	Remain Unchanged - This is biased towards Oracle vendors, thereby prohibiting fair competition for the benefit of hardware, software, and database for the department.	The Lead Partner shall independently satisfy all qualification requirements relating to: • Financial capability; • Technical capacity; • Experience in similar contracts; • Contract management capability; and • Any other specific qualification criteria stipulated in the Bidding Document (Procurement Document).	Remain Unchanged
03	Volume II – Option 1 – Technical Specification of Servers – IBM Architecture – Clarification No.12	Remain Unchanged - The memory scalability for Intel is specified as 4TB per node, while for IBM Power it is specified as 8TB per socket, which is an incorrect bifurcation.	Memory Capacity – Up to 8TB per socket or above	For Option one and two Minimum Memory Size 1TB and Memory scalability - 4TB

04	Volume II – Option 1 – Technical Specification of Servers – IBM Architecture – Clarification No.13	As per the clarification, it is required to segregate network connectivity for Client, Replication and Backup. In order to cater the network requirement, it is required to have 12 X 10G base T Ethernet ports from both servers (6 X 10G baseT Ethernet per server). Kindly confirm, whether DIE have ports availability in DIE environment.)	The base specification (2 x LP 4-Port 1GbE + 2 x 2-Port 10GbE SFP28 Ethernet, plus a separately specified 3 x 32Gb 2-port FC HBA = 6 FC ports) already provides redundant, segregated connectivity for client, RAC/interconnect, SAN, backup and replication traffic. This is the minimum requirement; Bidders may propose an enhanced adapter configuration (e.g., 4 x Dual-Port 10GbE + 4 x Dual-Port 32Gb FC) as a value-added alternative, provided the stated minimums are met or exceeded.	Department will provide 6*10G ports from each switch
05	Request For Extension (Vol I Page 5)	Extended until 28.07.2026	Extended until 21.07.2026	Extended until 31.07.2026
06	Request For Extension (Vol I Page 5)	Extended until 04.08.2027	Extended until 21.07.2027	Extended until 31.07.2026
07	Request For Extension (Vol I Page 5)	Extended until 04.08.2028	Extended until 21.07.2028	Extended until 31.07.2026
